SOFTWARE ENGINEER (Front-End)

Bangkok Thailand · 099-959-9161 · timetime479@gmail.com · lineid : maitotime

SOFTWARE DEVELOPER & SOFTWARE ENGINEER (FRONT-END EXP 3Y+)

A Computer Science graduate seeking a position in software development, with expertise in both frontend and backend development, or full-stack roles. Possesses experience in web development using React and .NET, with a solid understanding of Agile methodologies, and hands-on experience in writing unit tests and UI tests.

KEY COMPETENCIES

Computer language : [JavaScript](#), [TypeScript](#), HTML/CSS, SQL.

Libraries and frameworks : [React](#), [NextJs](#), [React-Native](#) vite, Redux, context, Hook, Tailwind, mui, antd,

Tools and Other : VSCode, Rider, docker, gitKraken, Git, Postman, Postgres.vitetest, cypress.

EDUCATION & CERTIFICATIONS

Kasetsart University

Computer Science (Second-class honors)
June 2018 – April 2022

PROJECT

Duckling Learning E-learning (Senier project)

- Develop websites with javaScript and php.
- Design systems, databases, uxui designs and build projects from start to finish.

- Project about Teaching how to code in C language
The content and pictures are taught and after each lesson is completed. You can take tests and play games to collect points.
- When you complete all lessons you will receive a certificate. The serial number on the certificate can be searched on the website.
- There is a back-office system for admins to add new lessons, exams, and games. They can also send emails to users.

WORK EXPERIENCE

● 7 solutions co. ltd

April 2025 - present

Mid Software Engineering Front-end

stack : NextJs, ReactJs, React-Native TypeScript, tanstack query, Hook&Form, Zustand, axios, shadcn UI
I was responsible for leading the front-end development of Check-in Plus, a hotel booking platform developed by 7 Solutions, a software house under Nokplus. This project involved building a responsive web application for both desktop and mobile platforms using Next.js, focusing on enhancing the user experience for both hotel guests and administrators.

- Developed responsive web applications for both desktop and mobile platforms using Next.js.
- Contributed to the Check-in Plus hotel booking platform by building key user-facing features, including the Landing Page, Sign In, Sign Up, Forgot Password, and User Profile pages.
- Implemented the Hotel Detail page for hotel-side content presentation.
- Integrated multi-language support using i18n and custom presets to serve a global user base.
- Built calendar-based pricing displays for dynamic hotel pricing.
- Collaborated on the development of the Back Office mobile application using React Native, allowing hotel owners to manage their data conveniently on mobile devices.

<p>The Able by King Power</p> <p>Senior Software Engineering Front-end</p> <p>stack : NextJs, ReactJs, TypeScript, tanstack query, Hook&Form, mui, Storybook, unit-test</p> <p>This project involves developing the King Power membership system website with Desktop and Mobile Responsive support, focusing on enhancing member services, including point accumulation and redemption, coupon usage, and multi-language support. Additionally, it integrates points from all stores within the King Power network and participating merchants, providing a seamless and more convenient experience for customers.</p> <ul style="list-style-type: none"> • Developed and maintained the King Power website with Desktop and Mobile Responsive support. • Designed and implemented a Tier Membership System to manage exclusive member privileges. • Developed a Co-brand System for partner merchants and bank credit cards. 	Jan 2025 - April 2025
<p>Axons Corporate (CPF-IT)</p> <p>Senior Software Developer Front-end</p> <p>stack : ReactJs, TypeScript, Redux, Context, Hook&Form, Tailwind, vite, unit-test, cypress</p> <p>I have been assigned responsibility for three projects: maintenance, packhouse, and monitoring. My responsibilities include</p> <ul style="list-style-type: none"> • Responsible for writing the website according to the design received. and provide guidance to the Design team to create a complete and feasible UI. • Develop frontend websites using React framework and use Redux to store Context data for managing component data. • Design and manage project structure using MVVM principles to separate UI and logic. • Wrote unit tests to test various logic functions and wrote Cypress to test the correctness of the UI. • Develop a RESTful api with .net c# in the backend. CRUD to send to the frontend by postgres as a database. • Receive consume data from other servers using Kafka as an intermediary to filter the received data before storing it in the database. • Use Agile working principles to plan work with the development team for each sprint so that the work is systematic, problems can be seen and can be resolved quickly. • Code Review Junior is there to advise on better ways and is waiting to make suggestions. Both about writing code or using various libraries and sharing additional knowledge. • Projects about reporting repairs to machinery and equipment, managing fruit and vegetable packing factories, reporting vehicles entering and leaving the factory and products. 	April 2022 – Dec 2024
